

10 Gigabit Ethernet card cannot recognize optical module

Overview

Check for common connection problems, such as link failures or modules not recognized. Inspect the sfp module and cables. Inspect and clean SFP+ modules and fiber connectors regularly to prevent. Hello, I'm reaching out for assistance, hoping someone can guide me to a solution to get "Link detected: yes" on my network interface. Switch Side: The other end is a switch with a Linktel SFP, also 850nm. The following are notes on the use of Gigabit optical modules and 10Gb optical modules, some common causes of failure and the corresponding. I recently purchased two SFP-10G-SR SFP+ modules and I can't seem to get them to work at all in my WS-C3650-PD48-S I put the SFP into either 10 Gigabit port and I see this on the console: But the interface never actually comes up. I don't get any additional messages in the log or the console (I had. When an SFP module reads "Not Detected" or "Not Present" on a switch, this indicates that the device cannot recognize or communicate with the module. Another fix I tried was taping over PCI pins B5&B6 on the.
