

2-core single-mode butterfly fiber optic cable

Overview

GJXH fiber optic cable is an indoor optical cable specially developed for FTTH (Fiber to the Home). The optical fiber core is located in the center of the cable body, two reinforcing cores are placed on both sides, and the outer layer is enveloped and sheathed to form a cable. The average amount of time supplier took to respond to every buyer's first message over the past 30 days. Whether in data centers, home entertainment systems, or industrial machinery, these cables prove their worth. Here are some key areas where butterfly cables shine: Data Centers and Networking: Butterfly. VCELINK 2 core fiber cable is a versatile and cost-effective solution for various applications. Its small diameter and lightweight construction allow it to be installed quickly and efficiently using mechanical splicing technology. FTTH (Fiber to the Home). Although it is said that outdoor single-mode butterfly fiber optic cable is widely used for long-distance transmission in integrated wiring, not many people have a deep understanding of its purchase.
