

8-shaped optical cable G 652D specifications and models

Overview

The GYFTC8 series of figure 8 self-supporting outdoor optical cables, distinguished by non-metal strength members (ideal for non-conductive needs). The range includes sub-series like GYFTC8A, GYFTC8A53, GYFTC8S, and GYFTC8Y, with G. 652D fiber type and core counts from 4 to 288. "Leviton is dedicated to designing, developing and manufacturing sustainable high performance structured cabling and specialty cabling solutions. " The information contained in this document is valid and correct at the time of issue. Its primary innovation is the virtual elimination of the water peak attenuation around the 1383nm wavelength. This enhanced single mode fibre provides improved performance across the entire 1260 nm to 1625 nm wavelength spectrum due to its low. The Soft Tube Cable (STC) is a non-metallic, longitudinal water-protected outdoor fibre optic cable, designed for the construction of optical infrastructure networks (back-bones, distribution and access). ARTIC ensures a stable quality control system for our cable products through several programs including ISO 9001, ISO 14001 and ROHS. Characteristics of a single-mode.
