When it comes to aerial cabling or outside plant (OSP) deployments, ADSS cable will provide an efficient and optimal solution in most of the cases. The remarkable advantages of this ADSS fiber cable are twofold: reliable and cost-effective. Fundamentally speaking, ADSS fiber optic cable is small in size, light in weight, strong in structure, and f. 48 Core ADSS Fiber Cable SM G652D 150m Span Waterproof The optical fiberglass in the ADSS optical cable is guided into loose tube in a wave shape, and then the loose tube is twisted to produce a twisted excess length. The optical fiber has an appropriate excess length, which ensures that the optical fiber is not stressed when the optical cable is s. Originally, ADSS cable was developed from a military lightweight rugged deployable (LRD) field cable. With the continuous improvements, it is now used for short span aerial installations—typically on roadside power distribution poles. Since the ADSS cable is non-metallic, it is ideal for applications near high-voltage power distribution lines for w.
