

AI Servers in the Next 30 Years

Overview

AI-optimized server market spending is projected to reach \$268 billion in 2025, up from \$140 billion in 2024. Hyperscalers will account for 67% of this spending by 2029. The focus on AI capacity is outweighing impacts from tariffs or the geopolitical uncertainty that other. North America held a 38. 2% revenue share of the global AI server industry in 2025. By processor, the GPU-based servers segment held the largest revenue share of 53. 88 billion in 2024, at a CAGR of 34. The North America AI server market accounted. The compute server market is set to undergo significant growth driven by the increasing demand for accelerated servers to support AI applications. I need the full data tables, segment breakdown, and competitive landscape for detailed regional analysis and. With GPUs standardized around Nvidia, vendors compete on AIOps, liquid cooling, and deployment services as enterprises ramp up inference in 2026.
