

Adaptive headlight low beam module malfunction

Overview

This warning indicates the vehicle detected a problem with the headlamp system that adjusts aim or beam pattern. It can stem from a failed module, a bad stepper motor, wiring issues, or moisture in the lamp assembly. A diagnostic scan that reads lamp-specific fault codes helps. When the adaptive light module fails, your headlights lose this intelligence—leaving you with reduced visibility during night driving and turns, which directly impacts your safety on the road. The right unit failed its startup sweep and did not follow steering input. A scan returned CEM-U132382, which named the right adaptive module. The message usually. BMW Adaptive Headlight Malfunction is a common issue reported by BMW vehicle owners. and the intereseting! - this problem is only if the main light switch is. This guide covers the common failures, replacement costs, and critical programming requirements for the headlight control module on many 2021-2025 BMW models. Allowed to dry & reassembled.
