

Aluminum alloy bracket for optical cable

Overview

The Aluminum Support consists of a base and keeper made from high-strength aluminum alloy, with soft, pliable dielectric inserts to protect the cable. Brackets and hooks are developed to anchor and suspend the fiber clamps on the wall or poles, when building fiber optic cable lines or energy lines. CS 1500 installs on all type of poles: drilled or not, steel, wooden or concrete-made. For drilled poles, installation is to realize with a bolt 14/16mm. The FAS is designed for in-line support with a maximum angle change of 20° and. Zhuhai Surelink Communication Cable Co. is a professional manufacturer in producing communication data cables, patch cord, drop wire, telephone cable, alarm cable, coaxial cable, electric cable, telecommunication cable, optical fiber cable, other cables as well as telecom accessories for. This fiber optic OSP bracket is used with tension cable clamps to support ADSS cable hang on the pole or wall. Physical Characteristics Material Aluminum Alloy Color Silver Compatible. This wedge clamp composed of an opened thermoplastic body with very high mechanical and climatic resistance, an inner sheath consisting one or two insulating plastic wedges ensuring the clamping of the neutral messenger without damaging cable insulation. Two stainless bail ends are compressed on it.
