

# Argentina Telecommunication Tower Testing Qualifications

## Overview

In order to obtain a type approval certificate in Argentina, tests must be carried out in an accredited ENACOM laboratory ; therefore, local engineering regulations require in-country testing, meaning manufacturers cannot take advantage of 2014/53/ EU or FCC testing . In order to obtain a type approval certificate in Argentina, tests must be carried out in an accredited ENACOM laboratory ; therefore, local engineering regulations require in-country testing, meaning manufacturers cannot take advantage of 2014/53/ EU or FCC testing . On 24 February 2026, the ENACOM (Argentinian National Communications Entity) issued Resolution 57/2026, introducing updates to the telecommunications equipment registration framework in Argentina. The objective of the regulation is to modernize the sector, encourage innovation, and streamline. Argentina has introduced Resolution ENACOM 57/2026, a sweeping modernization of the country's telecommunications equipment approval framework. All equipment connected to public telecommunications networks and using radio frequency bands need to apply for ENACOM certification. ENACOM certification is a compulsory certification, which requires sample. The Ente Nacional de Comunicaciones (ENACOM)\*\* serves as the regulatory authority for telecommunications in Argentina. This approval is required for most. NWSA representatives initially defined two levels of telecommunications tower technicians for crew members who perform general construction activities with an emphasis on tower system installation, modification, maintenance, and inspection of support structures used in telecommunications, including. Argentina's national telecom authorities ENACOM has published a new Resolution denoted 'RESOL- 2022-2-APN-ENACOM#JGM', which amongst other entails that from 23 February, wireless network (WWAN) devices must be tested within Argentina. In the past, foreign test reports (s...
