

Cable fasteners inside cable trays

Overview

The fittings can be fastened to the cable tray rail either with double clamps of type DOP A2 or with truss-head bolts of type FRS and combination nuts. The exceptions to this are vertical bends, adjustable bend elements and fittings with a side height of 35 mm. These fittings can maintain spacing or to keep cables in place when the tray is erect the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resilience and safety. Our cable support. MILWAUKEE®'s range of cordless fastening tools has been designed to provide comfortable, balanced, and reliable performance. Our plastic cable ties are made of polyamide 6.6 and offer high performance fastening.
