

Cable tray bridge model

Overview

This 3D model features a 600mm x 200mm cable tray, including various junction components such as T-junctions, L-junctions, and cross-junctions. Additionally, it contains supporting profiles for both ceiling and floor installations. An example cable route is also included within. Discover all CAD files of the "Cable trays" category from Supplier-Certified Catalogs in SOLIDWORKS, Inventor, Creo, CATIA, Solid Edge, autoCAD, Revit and many more CAD software but also as STEP, STL, IGES, STL, DWG, DXF and more neutral CAD formats. Cable tray and cable ladder systems are an ideal alternative to electrical conduit systems. Why use cable tray?

A properly designed and installed cable tray system provides outstanding reliability for a facility's control, communication, data, instrumentation and power systems cabling and wiring. com Design App Load BIM objects straight into Revit in 1 click. Select a containment product and define alignment, elevation, offset, and bend and branch types and you are ready to start modelling. You can build your entire cable tray assembly using the following parts included in this component: - Straight - Sloped straight - Corner - 3-way junction - 4-way junction Features: - Choose from perforated tray, ladder and wireframe. ABB is a leading force in the cable tray systems industry.
