

## Cable tray with outward-curved shape

### Overview

Arc-shaped cable trays are cable trays with an arc-shaped structure. Adaptable to curved cabling: They perfectly fit curved shapes in circular buildings, stadiums, theaters, and other locations, making cable laying smoother and avoiding cable stress caused by right-angle bends. With our cable trays with integrated ends, Trayco® is constantly looking for solutions that increase our customers' competitiveness due to their capacity, light weight (L) or ease of assembly. The unique shape of our cable trays results in up to 50% extra capacity in specific applications compared. Cable trays support insulated electrical cables in industrial and commercial settings. Each cable tray type performs a different function and comes in various materials such as aluminum. Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Below are the most commonly used types of cable trays: 1. Combining local manufacture and distribution with an extensive product range, these facilities ensure we. Clear cable routing – Organized and safe cable management, easy maintenance, helps prevent failures. Strong and durable – Made of hot-dip galvanized steel or stainless steel, suitable for indoor and outdoor applications.
