

Cable trays used in China Unicom base stations

Overview

Aluminum alloy cable trays are specialized cabling devices used in data centers, widely used in the construction of base stations for China Telecom, China Unicom, China Netcom, and China Mobile. Cable trays are essential for organizing and protecting electrical wiring in industries ranging from power generation to manufacturing. It not only serves the purpose of cable management but also supports the weight. The best cable tray solution according to the environment! Yongchang is a leading manufacturer of GFRP cable tray in China, specializing in the production and development of FRP cable tray, steel cable tray, polymer composite cable tray, epoxy resin composite type tray and polyurethane cable. The company mainly produces and operates intermittent asphalt batching plant, drum asphalt batching plant, mobile asphalt batching plants, concrete batching plant, stabilized soil mixing plants and other road construction equipment. Due to changes in ambient temperature, steel cable trays will. Our Cable Trays offers exceptional quality within the Cable Tray category.
