

Canadian Aggregation Switch 400G

Overview

The AGR400 is a high-performance 100GbE aggregation router that consists of fixed 2 x 400G QSFP-DD (21.5 W) network interfaces in a 2RU compact design that can be deployed as a standalone router. The AGR560 is engineered with the Broadcom StrataDNX™ Jericho2c+ silicon. FS 400G data center switches offer high speeds and port densities to meet the network deployment requirements of various scenarios and the evolving requirements of next-generation data center networks. As data centers continue to evolve, the demand for higher bandwidth and faster network speeds will drive further advancements in the electronic components used in 400G/800G network switches. Electronic components used here are essential for maintaining signal integrity, ensuring efficient data. Our Cisco Nexus 9000 Series Switches portfolio offers distributed modular, centralized modular, and fixed switches including super spine, spine, leaf, and border leaf. We only offer IC Certified products.
