

Case Study of Gabon IDC Data Center Construction

Overview

This intervention concerns the feasibility studies of the Gabon Component of the Central African Fibre Optic Backbone (CAB) project. It includes the setting up of a National Data Centre (Datacenter), a Computer Attack Warning and Response Centre (CSIRT) and a public key. Gabon is set to position itself as a rising digital hub in Central Africa with the launch of construction on a state-of-the-art national data centre. The project, entrusted to leading infrastructure firm PORTEO S. Cybastion will work. Last Thursday, June 29, Gabon's Minister of Digital Economy, Jean Pierre Doukaga Kassa, and the CEO of the Indian company Shapoorji-Pallonji, Ransit Gajave, signed a memorandum of understanding for the construction of a national data center in Gabon. The national data center project has been underway for several months with the company first visiting Gabon in March 2023, but is.
