

Category 6A broadband fiber optic panel

Overview

These panels are part of our Solution 6A shielded system and are available in 24-port, 1U, flat and angled versions to support various configuration. Our unshielded and shielded Cat 6A patch panels present a product solution that exceeds TIA Category 6A standards and achieves superior performance compliance. With a wide range of fibre closures and fibre management options, including the Integrated Routing System, HellermannTyton's. Leviton Cat 6A flat and angled patch panels are available in 24 and 48-port varieties, with 110, universal, and QUICKPORT™ options. Category 6A High-Density Feed-Thru Panels can be used when connecting equipment in a telecommunications room and necessary to cross-connect using patch cables, in order to interface to the distribution cabling system. Fully shielded jacks and enclosed IDC terminals give maximum protection for connected cables. With industry standard 110 IDC blocks, the installation is fast and easy.
