

Chile has no fiber optic cables

Overview

On June 4, 2025, Chile's government and Google formalized an agreement to build the Humboldt Cable, a submarine fiber-optic line that will directly connect South America and the Asia-Pacific region. This project, first outlined in 2016 and developed through public-private partnership, will run. Telecom in Chile has come a long way since its privatisation in 1980—having the most sophisticated and well-developed infrastructure in Latin America. Over the years, the country has emphasised the importance to carry out priority programmes, deployment of 5G, submarine fiber optic cable and. The first submarine fiber optic cable was the PanAmerican Cable in 1997, which connects Arica, Chile with the US Virgin Islands in the Caribbean Sea, and countries in between. The 'Humboldt Project,' a 14,800 kilometer cable from Chile to Australia via French Polynesia, aims to provide a faster alternative to existing US connections.
