

Companies that use optical modules

Overview

Key players in the optical transceiver market include Coherent Corp. (US), INNOLIGHT (China), Accelink Technology Co. (China), Lumentum Operations LLC (US), Sumitomo Electric Industries, Ltd. (Japan), Broadcom. Optical transceivers are critical components in modern communication infrastructure, enabling the high-speed transmission of data across optical fiber networks. (formerly known as II-VI Incorporated) is a global leader in engineered materials and optoelectronic components, serving diverse markets such as telecommunications, industrial manufacturing, and life sciences. The optical module is in the middle of the industrial chain, and the upstream industry of optical modules mainly includes PCB, optical chips, optical. The number of venture-backed optical component startups has exploded - the Optical Component Start-Up Tracker identifies these companies and their value propositions. 6 billion in 2024 and is expected to reach USD 25. Factors such as the increasing adoption of smart devices and rise in data traffic, and growing demand for cloud-based services are.
