

Congo Fiber Ethernet Switch QSFP

Overview

The QSFP+ module is designed for 40GBASE Ethernet throughput up to 10km over single-mode fiber (SMF) using a wavelength of 1310nm via duplex LC connectors. This transceiver complies with QSFP+ MSA and IEEE 802.3ba 40GBASE-LR4 and OTU3 C4S1-2D1 standards. The Cisco 100GBASE Quad Small Form-Factor Pluggable (QSFP) portfolio offers customers a wide variety of high-density and low-power 100 Gigabit Ethernet connectivity options for data center, high-performance computing networks, enterprise core and distribution layers, and service provider. It explains their technical differences, compatibility considerations, and ideal use cases to help readers choose the right module for enterprise and data center. SFP (Small Form-factor Pluggable) and QSFP (Quad Small Form-factor Pluggable) are common optical module interfaces found on switches. SFP ports are small hot-pluggable module interfaces typically used for connecting fiber optics or copper cables. Others — particularly newer QSFP-DD and OSFP platforms — offer.
