

Connect one end of the optical cable to the optical module

Overview

To connect an optical cable to an SFP module, use the appropriate patch cord (e., LC-LC, SC-LC, etc). The patch cord must match the fibre type - single-mode or multi-mode. Once connected, verify that the port activity indicator is on and run diagnostic commands to check the. This section describes how to install optical transceivers on the SFP or SFP+ ports and connect them to the ports of the peer device using optical fibers according to the network plan. The USG supports both 1 Gbit/s, 10 Gbit/s, and 40 Gbit/s optical modules. The optical modules at both ends are. Small Form-factor Pluggable modules (SFP module) are the workhorses of modern network connectivity, enabling flexible fiber optic or copper links between switches, routers, firewalls, and servers.
