

## Cost of laying 48-core optical fiber cable in 2024

### Overview

The median cost of labor and materials to deploy underground fiber is \$18.25 per foot compared to \$6.55 per foot for aerial fiber, according to a new report from the Fiber Broadband Association (FBA) and the consulting firm Cartesian. In preparing this second edition of the Fiber Deployment Cost report, Cartesian gathered inputs from a wide variety of firms building. The initial cost of installing fiber optic cables can vary depending on the chosen installation method and specific project requirements. Total Project Costs: For commercial installations, expect costs ranging from \$5,000 to \$20,000 per mile for underground projects and from \$40,000 to \$60,000 per mile for aerial projects. Fiber optic cables are high-tech communications cables that carry information like bursts of light along extremely thin glass or plastic strands, providing high-speed, high-bandwidth connectivity with little loss of signal. In this article, Fibconet will.
