

## Distribution box with bottom

### Overview

The 3-Outlet (Bottom Feed) Distribution Box is a concrete box designed for distribution of effluent wastewater to a home's leach field. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. These plastic boxes come with a permanently attached lid. All bottom trays are made in a sturdy sheet metal design and are therefore suitable for embedding in concrete. Truly classic products are its 12-module-unit versions which now provides even more flexibility. The family is complemented thanks to new 5-row flush-mounted and hollow-wall distribution boards with up to 60 modules plus 10 MU reserve, which are also equipped. SELHOT's plastic power distribution boxes (plastic distribution boards) are impact and oxidation resistant, making them ideal for use in waterproof and dustproof environments. They are widely utilized in various fields, including solar energy photovoltaic systems, outdoor lighting installations. Könnor & Söhnen® Distribution Boards provide reliable connection for up to 7 groups of devices with a maximum current of 32A. Suitable for indoor and outdoor use.
