

Do I need to replace my router for a 100 Mbps fiber optic connection

Overview

Fibre optic only needs to be brought to your home, and from there it connects to your router using a standard cable. Q: What wiring does the installer add?

Installers typically run a new fibre line to an Optical Network Terminal (ONT) placed inside your home. And this means that choosing the. Most routers need replacing every 4-5 years or less if it has outdated WiFi Standards or software. If your current router predates the pandemic, it's likely approaching the end of its useful life. During 2020-2021, millions of families upgraded their routers to handle the sudden shift to remote. If your router is more than 5 years old, has connection issues, or if you just want to improve your range and speed, it may be time to replace your old router. What Makes Fiber Optic Internet the Gold Standard?

What Does "Rewiring" Mean for Fiber Optic Installation?

Do I Need to Rewire. To determine whether you need a new router or modem, it's essential to understand what each device does.
