

Double-door secondary distribution box for front and rear doors

Overview

Front and rear access in a single cabinet — engineered for high-density control panels, large switchgear assemblies, and installations where internal depth demands dual-door configuration. Available in stainless steel, carbon steel, and FRP with NEMA 4X and IP66 ratings as standard options. A double door distribution board, also known as a double door consumer unit or distribution box, is an electrical enclosure used to house the electrical wiring and protective devices for a building's electrical system. It is an essential component of the electrical distribution system and serves as. Need Quick Assistance?
