

F650 Digital Relay Protection Device

Overview

The Multilin F650 feeder protection relay provides high speed protection and control for feeder management and bay control applications, and comes with a large LCD and single line diagrams that can be built for bay monitoring and control for various feeder arrangements including. The Multilin F650 feeder protection relay provides high speed protection and control for feeder management and bay control applications, and comes with a large LCD and single line diagrams that can be built for bay monitoring and control for various feeder arrangements including. Cost effective protection, automation and control of distribution feeders The Multilin F650 has been designed for the protection, control and automation of feeders or related applications. 5x EnerVista F650 Setup version: 7. 5x GE publication code: GEK-113000AE *GEK-113000AE*. Page 2 The contents of this manual are the property. The GE F650BFBF2G0HIE addresses that core need by combining protection, control, monitoring, and automation in a single relay unit. GE Multilin F650 Feeder Protection System instruction manual for revision AH.
