

Fiber Optic Cable Adhesive

Overview

The table below lists a selection of adhesives that are suitable for joining, reinforcing and sealing fibre cables, fibre-chip interfaces and fibre arrays. Further products and custom solutions are available on request. To download the technical datasheets (TDS) please click on. Electrically non-conductive adhesive for fiber optic assembly applications This low viscosity, 2-part, non-conductive adhesive is specially formulated for fiber optic assembly applications. It is resistant to both thermal shock and impact. WARNING! All marks used are trademarks and/or registered. Master Bond offers an extensive line of epoxies and UV curing systems for use in fiber optics devices. Master Bond's adhesives contain no potentially objectionable contaminants and exhibit excellent resistance to. To secure fibre-optic cables, fibre arrays and waveguides, Hoenle has developed special adhesives that can allow an unimpeded transmission of light at optical interfaces. To maintain their light transmission properties, they do not yellow or otherwise change in colour with age. Step one is determining the epoxy, adhesive or fiber coating that best fits the specific termination or application.
