

Fiber optic cable into switch or gateway

Overview

Choose an SFP module based on the fiber optic cabling that will be connected to the network switches. In this article, we'll explain how to connect multiple Ethernet switches using fiber optic cables and the equipment required for this to work. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. Unlike traditional copper cables, fiber optic cables leverage the principles of light propagation to transmit data over long distances with minimal. This guide breaks down exactly how to use SFP ports on UniFi switches and gateways for fiber connections, what modules you'll need, and a few real-world tips that'll save you time and money. Let's dive in !! Before we dive in, please don't self-host your UniFi Controller if you take care of client. As we speak I just have optic fibre (Community Fibre) connected to my Huawei modem / Linksys Velop which will be connected to a new POE switch (need to identify the best model to be compatible with my optic fibre extension project). The objective is to run 1 or 2 additional RJ-45 copper Ethernet cable and fiber-optic cable.
