

French Consulting Core Switch 100G

Overview

Enterprise SONiC based 32 port 100G QSFP28 aggregation core switch for aggregation spine architecture, which line rate L2 L3 up to 3.2Tbps, Marvell Falcon, ROCEv2 EVPN Multi homing supported. FS 100G Ethernet Switches with high speed and port density give you cost-effective options to incrementally upgrade and have flexible bandwidth across the existing infrastructure in enterprise campus network. The C-LIGHT CLS6862-54XC is a 100G high-performance switch designed for data centers and enterprise networks, delivering robust performance, reliability, and scalability. Features

- Powerful Forwarding Capability - 1.92Tbps switching capacity with 48×10G SFP+ ports, 2×40G QSFP ports, and 4×100G. Two Flash chips are used to store the system boot program for hardware-level boot redundancy, avoiding device failure caused by a failed Flash chip. with significant improvement in address table capacity and network security. Point-to-multipoint directional communication can avoid data redundancy. The Arista 7500E Series modular switches provide dense 100GbE solutions with support for industry standard 100GBASE-SR10 and distances up to 400 meters with OM4 multi-mode fiber. In a number of applications such as campus and inter-datacenter connectivity support for distances in excess of 400. The 100G Ethernet Switch is a high-performance network device engineered to provide throughput of up to 100 gigabits per second (Gbps). By leveraging 100G Ethernet technology.
