

Gigabit fiber optic connection cannot be used with a router

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. Since the FRITZ!Box establishes and controls its own internet connection, all FRITZ!Box functions (such as the firewall, parental controls, MyFRITZ!) are also. I purchased a fiber optic modem (Glasfaser-Modem 2) from Telekom and would like to use it with my own router model Mi Router 4A Gigabit Edition. I need information on what settings I need to configure on my router to access Internet. Simple test, swap cables to check, if all hardware is gigabit capable and all settings are correct but speed is wrong then cable is most likely the suspect, whether wired incorrectly or a split/ frayed wire. Despite multiple attempts, the Archer AX6000 v1. This guide will break down everything you.
