

Have fiber optic pigtail prices increased recently

Overview

From late 2025 into 2026, global fibre optic prices have increased sharply and across the board — standard single-mode, bend-insensitive grades, and in turn pre-terminated assemblies, patch leads, and bulk cable. The causes are structural, they are not going away quickly, and understanding what is. In the latest Optical Fibre and Cable Market Outlook, CRU examines the recent acceleration in fibre pricing and the tightening supply conditions emerging in early 2026. In some cases, suppliers only guarantee quotations for the same day, and in extreme situations even half-day quotations are appearing in the market. For many professionals who have worked in the optical. The global fiber optic industry is entering a new pricing cycle. As of March 2026, spot prices for G. A2 have surged past \$32 per kilometer, a level nearly unthinkable just a year ago. 652D optical fiber prices are rising in 2025–2026, how FTTH cable budgets are affected, and what procurement teams in Europe, Latin America, Africa and the Middle East can do to manage risk.
