

How much does 10 Gigabit single-mode fiber optic cable cost per meter

Overview

Single-mode fiber (OS2): This is the industry workhorse. In 2025, the base glass price has stabilized. The price swing usually depends on the fiber count (e. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. The pricing of single-mode fiber optic cables varies significantly based on construction, application, and specific features. Custom-built cables or niche specifications can lead to higher prices. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. This guide presents ranges in USD and practical price estimates to help. The average OM3 fibre cable price in Australia typically ranges between \$0. While OM3 was once a common choice for 10Gbps backbones, it's becoming.
