We cover everything from separating color-coded wires and securing them with ties to. Before you run each cable to the panel, use a permanent marker to write—right on the end of the Romex sheathing—which circuit the cable feeds: “Kitch A,” “Bath B,” “2d Flr Lights,” and so on. It takes the incoming power and safely distributes it to different circuits throughout your building. It involves the placement of breakers, contactors, busbars, terminals, protective devices, and wiring in a structured and safe. The final position should be determined considering both practical convenience and aesthetic appeal, without compromising functionality.
