

How to bridge Huawei fiber optic routers

Overview

The answer, which is specific for this hardware and maybe even this ISP, is that there is no way to change the router to work in bridged mode, but there is a LAN port (port #4) that is dedicated to bridging. If the HUAWEI router is new or has been restored to factory settings, you can click the link ([How do I connect my HUAWEI router cascade to the old router through the network cable and set it as the secondary router](#)) to configure wired bridge for the HUAWEI router. If you have configured the router. I have an optic cable that is plugged into the internet providers provided router, Huawei EchoLife HG8145V5. I also have my own TP-Link AC2300 v2, which has more ports and nicer features. I currently have the TP-Link plugged into the LAN of the Huawei (thus creating two LAN networks), but I would. In this tech tutorial, we'll guide you through the complete process of Huawei router configuration for optimal performance. Learn how to set up your HG8321R and ONU fo. The exact model is "HG8247H". Activate a wireless bridge mode by accessing the settings on both your primary wireless router and a secondary.
