

Huawei Fiber Optic 1 2 Splitter

Overview

With dimensions of 110*60*10mm, this 1:2 even split optical device, featuring SC/APC connectors and built-in pigtails, makes it perfect for high-performance networking setups. optical splitting in an ODF and FDT. requirements in different scenarios. □ The input pigtail can be easily distinguished from the output pigtail due to the color difference. □ Made of PC+ABS/PPO material in order to meet. Introducing the Huawei OSPL51201, a state-of-the-art compact optical splitter designed for precise and efficient signal splitting needs. ODN node products are used to connect and protect optical cables. An optical splitter is a passive functional component that split an input optical channel into multiple output channels at an. Shop our selection of Huawei fiber optic splitters for reliable and efficient optical networking. With Huawei's core concept for ODN construction centering on full and dense coverage coupled with short and easy access, Huawei's ODN 3. In the earliest FTTH solution, ODN 1.
