

## Huawei Fiber Optic Router Internet Control

### Overview

Open the AI Life app and log in with the HUAWEI ID that is linked to your router. Touch Connected devices (or go to Devices > Connected devices) to start managing devices. You can manage the devices connected to your router in the list of connected devices in the AI Life app, for example, to block certain devices from accessing the Internet, or limit the Internet access speed on certain devices. 1 (indicated at the bottom of HG8145X6N). Configuring it correctly is essential to ensure optimal performance and adequate security on your network. I also have my own TP-Link AC2300 v2, which has more ports and nicer features. I currently have the TP-Link plugged into the LAN of the Huawei (thus creating two LAN networks), but I would. If you are unsure of what the IP address of the secondary router has been modified to, you can determine it by following these steps: Connect your computer to the LAN port of the secondary router using an Ethernet cable, check the IP address of your computer and use the IP address segment of your. Learn how to use the Web Page to configure a new router and stay connected to the Internet easily.
