

Huijue 96-core Small Square Fiber Optic Distribution Frame

Overview

Equipped with LC/UPC adapters, the ODF supports up to 96 fiber cores, delivering low insertion loss and consistent performance for short- and medium-distance optical links commonly used in access and transmission networks. Fiber Optic Distribution Frame (or shortened as ODF), is used to form and distribute the local backbone optical cable in the optical fiber communication system, to fit the requirements of the connection, distribution and dispatch of the optical fiber line easily., Ltd (HJ Network for short) is the leading manufacturer and solution provider for telecom and communication products. Designed by Fenxi Optoelectronics Technology, this distribution frame integrates fiber termination. ODF 96 Core is a high-density fiber optic distribution frame designed to meet the ever-increasing demands of today's network systems. This ODF configuration is specifically optimized for SC connectors.
