

Is it necessary to replace the router with a new one for fiber optic cables

Overview

Rewiring your home is generally not necessary for fiber optic internet installation. Fiber optic service usually connects to an Optical Network Terminal (ONT) at your home, and from there, the signal can be distributed using your existing wiring, such as coaxial or Ethernet cables. In many cases. This wikiHow article teaches you how to replace your router with a new one. Plug an ethernet or coaxial cable into the wall. Then, plug in the modem and router. To set up the router, type in its IP address into your browser. When Should You Upgrade Your Router?

Unless it's obviously broken, replacing your router is not usually at the top of your priority list. What Makes Fiber Optic Internet the Gold Standard?
