

Israel Fiber Optic Communication Construction

Overview

Israel plans to construct a 254-kilometer fiber-optic cable along its existing oil pipeline, connecting Europe to Gulf countries and Asia, while positioning itself as a communication land bridge. For the first time, homes in the City of the Patriarchs are connected to broad band Internet. At a ceremony attended by the Minister of Communications, the Minister of Settlements and National Missions, the Head of the Jewish Settlement Administration in Hebron and the Bezek telephony company, the Ministry of Communications is preparing for the gradual shutdown of outdated copper and cable networks, which have so far been used for telephony and television services by Bezeq and HOT, as the country moves toward full adoption of fiber-optic networks by the end of 2030. The shutdown will. The Europe Asia Pipeline Company, which manages a network of crude oil pipelines between Ashkelon on the southern Mediterranean coast and Eilat on the Red Sea, is waging a new legal and environmental battle — this time to go into the fiber optics business. The project, announced by the country's Finance Ministry, will establish an uninterrupted link between. IBC Unlimited is owned by Hot, Cellcom, Israel Infrastructure Fund and the Israel Electric Company. The company, which currently reaches more than 1. Shlomo Karai, stated: "Shutting down the copper cable network will lead to huge cost savings for the infrastructure companies, resulting in better competition in quality and price for the benefit of all of us. The mechanism of shutting down the.
