

Korean-branded hybrid optical and electrical cable 12 cores

Overview

UnitekFiber's 12-core GDTs hybrid cable uses single-mode G655 optical fiber, ensuring superior signal stability and integrity during high-speed and long-distance transmission. Hybrid cables are next-generation transmission cables developed based on Huawei's innovative optical-electrical PoE solution. distance and high-power PoE++ power supply for them. Then optical sub-units and copper wires are stranded around a non-metallic central strength member to form a cable core. The Giga-Volt hybrid solution incorporates both fibre and copper conductors in one cable that deliver power and data to a remote device through copper and fibre medium. As connectivity needs converge, APAR hybrid cables help builders meet demand with unique cable designs across multiple use cases. Imm (main cord) Material Stainless Steel Color Silvery White UL94 V-0 (*Burning stops within 10 seconds on a vertical specimen, no drips of flaming particles.) *Exact product code is subject to the cable length. Specifications are correct at time of printing and subject to change or alteration. Feature highlights: Photoelectric Composite Hybrid Optical Fiber Cable GYXTW RVV Armoured offers 12 cores with 1mm*2 and 1.
