However, this document does represent a re ight of the experience, are of direct and specific interest for the application of the LVD. This guide. This handbook is provided for the use of all Departments of the ITER Organization and is addressed primarily to system specifiers, designers and users of electrical components in otherwise non-electrical plant systems, rather than to designers of the power supply systems. It applies to voltages between 50V and 1000V for AC and 75v and 1500v for DC (direct current). The language used to write standards in recent decades mainly reflects the needs of printers and the. ents), and the electrical equipment, formed by the internal connections and by the incoming and outgoing termina is regard, there has been an evolution which has resulted in the replacement of the previous Standard IEC 60439 with the present Stand rd IEC 61439.
