

Mexico electrical distribution box processing plant

Overview

Schneider Electric says it will invest USD 29 million in a new plant in the state of Nuevo León, Mexico, focusing on the manufacturing of low-voltage electrical distribution boards. Mexico's National Power System (Sistema Eléctrico Nacional or SEN) is one of the largest in the world and it provides electrical supply to more than 129 million inhabitants. SEN planning is based on clear criteria for the installation of new power plants that guarantee a sufficient, efficient. CFE: 2026-2027 Portfolio with 58 projects to strengthen electricity transmission in Mexico (03/22/2026). On April 9, 2025, the Government of. Continuing its commitment to sustainable manufacturing, ABB's Mexican production site for load centers and safety switches in Saltillo has reduced emissions by 80 percent in the past two years. The latest figures show that the site has reduced emissions by over 5,200 tons of CO_{2e} against baseline. April 6, 2022 - Electrical Components International, Inc., a leading manufacturer of electrical distribution equipment, today announced a significant expansion of its manufacturing footprint with the development of a new, state-of-the-art facility in Mexico. The approximately \$100 million investment underscores the. Collectively, the new legal regime institutes a centralised model marked by State planning through the Ministry of Energy (SENER - the constitutional monopoly in certain segments) and the continued operation of a Wholesale Electricity Market (WEM) for the performance of purchase and sale.
