

Nordic Terminal Box 24-Chip

Overview

The GP-T404-24F is a compact fiber optic floor terminal box for FTTH in MDUs, supporting 12/24 fiber splices and cable transitions for riser and horizontal setups. The data in this product selector reflects a snapshot as of 28. Specifications and features may change without notice. Nordic Semiconductor makes no warranties as to accuracy or completeness, and accepts no liability for decisions made in reliance on this information. Our products are certified for installation technologies all over the. AR-DB-24P-CB It is intended to house and protect optical splices by merging between the trunk cable and the output cables of a terminal optical network. Possibility of use with fusion splicing system or connectorization. Has fiber reserve system with loose tube and accommodation. The 24F Terminal Access Box is a multi-purpose fiber terminal that can be splice-ready with pigtails or with one or two splitters, serving up to 24 SC ports. It is suitable for FTTx applications in multi-dwelling buildings (indoor applications only). This terminal is small, light-weight and perfect. NORDEN Fibre optic DIN rail mounted terminal box is available for the distribution and terminal connection for various kinds of optical fibre system, especially suitable for mini-network terminal distribution, in which the optical cables, patch cords or pigtails are connected.

Article Content

24Cores Fiber Access Terminal Box

24Cores Fiber Access Terminal Box is able to hold up to 24 subscribers. It is used as a termination point for the feeder cable to connect with drop cable in FTTH network system. It integrates fiber splicing,
