

PCB in AI server

Overview

From traditional multilayer boards to high-end high-density interconnect (HDI) boards, and emerging integrated circuit substrates, PCB technology is emerging as a key factor that either constrains or propels AI computing capabilities. With the rapid advancement of artificial intelligence technology, the AI server market is experiencing unprecedented growth. Within this hardware ecosystem, printed circuit boards (PCBs) play a critical role as the structural foundation for electronic components and the provider of electrical. An AI server motherboard is still a board-level release problem that must separate motherboard review, backplane escalation, and narrower SerDes validation. Freeze stackup posture, controlled-net ownership, power-path review, and connector-zone escalation before the build package moves into. As the core carrier of GPUs, high-speed CPUs, and complex interconnects, the design and manufacturing complexity of AI server motherboards (PCBs) has increased dramatically. AI server demand is the primary driver, with PCB value-per-server increasing by up to 12 times compared to traditional servers. The supply crunch is causing production delays for AI.

Article Content

AI Server PCB Revolution: High-Frequency Materials & Market

Explore 2026 market trends, high-frequency materials, the shift to AI server PCB, and how to choose the right manufacturer. The NVIDIA M10 test is driving a PCB industry revolution.

PCB Raw Material Prices Surge Up to 40%: How AI-Driven High-End

2026 PCB upstream CCL price surge analysis: AI server demand drives high-end HDI and IC substrate growth, copper foil & spherical silica powder material cost spikes, and local

Open-Source AI PCB Design Tools in 2026: KiCad AI Plugins vs. Flux AI ...

Compare KiCad AI plugins, Flux AI, and Celus for PCB design in 2026. Find the best open-source AI tool — and learn how to choose a reliable PCB manufacturer.

Power and Cable Solutions: Power Cable and Prong Connector for AI Server

AI server PCB fabrication with HDI via-in-pad copper filling for GPU designs with 24+ layers. We provide one-stop AI server PCB manufacturing, including component sourcing, PCB

CCL Market Tightens as Korea Import Prices Reportedly Rise

AI-driven demand is surging across the supply chain, with copper clad laminates (CCL) also coming under significant strain. According to Hankyung, citing sources, a Seoul-based PCB

PCB Prices Jump 30% as AI Server Boom Strains Global Supply

A global Printed Circuit Board (PCB) supply chain crisis is escalating due to soaring AI server demand and raw material shortages, leading to significant price increases from major suppliers.

AI Server PCB Manufacturers Break Through 20-40 Layer High

Discover how AI server PCB manufacturers & AI data center PCB manufacturers overcome 20-40 layer HDI PCB bottlenecks with advanced materials, precision drilling & thermal management.

GCE expects significant growth in AI server boards,

Taiwan-based PCB maker Gold Circuit Electronics (GCE) expects its AI server boards' share in overall server board shipments to rise from a low single

Deconstructing AI Servers: A Look Inside PCB Composition and Value

Explore AI server PCB architecture, including GPU boards, AI server motherboard PCB design, and insights into the PCB for AI server market and value distribution.

What is AI Server PCB?

An AI server PCB—specifically, a printed circuit board designed for use in artificial intelligence servers—stands as one of the core components of such systems.

Global AI Server PCB Market Research Report 2025 (Status and

Global AI Server PCB Market: Market Segmentation Analysis The research report includes specific segments by region (country), manufacturers, Type, and Application.

AI Server Motherboard PCB Manufacturing Checklist Before Release

Use this AI server motherboard PCB manufacturing checklist to freeze stackup, impedance ownership, dense BGA review, route separation, and NPI handoff before build without

Taiwan's Nan Ya PCB forecasts revenue growth on rising AI demand

Taiwan's Nan Ya PCB forecasts revenue growth on rising AI demand Company targets AI server and computing device supply opportunities May. 14, 2026 15:00

The AI Server PCB Revolution of 2026

The global PCB market crossed \$100.64 billion in 2026 — a milestone driven overwhelmingly by AI server and high-performance computing infrastructure.

PCB For AI Server Market's Decade-Long Growth Trends and Future ...

The booming AI server market fuels explosive growth in the demand for specialized PCBs. Discover key market trends, forecasts (2025-2033), leading manufacturers, and regional market

Thermal Management for AI Server PCBs: Vapor Chambers, Heat

Thermal Management for AI Server PCBs: Vapor Chambers, Heat Pipes, and IMS Boards Artificial intelligence workloads are among the most thermally demanding tasks ever placed

Iran war disrupts the circuit board supply chain, raises costs for tech ...

PCB prices surge up to 40% in April, driven by AI server demand and material shortages Manufacturers warn of rising costs for resin, copper, and other materials

AI Server PCB Latest Industry Trends: Revenue, Price, Sales Analysis ...

Market Research Industry Today AI Server PCB Latest Industry Trends: Revenue, Price, Sales Analysis Report 2026 This report systematically analyzes the current status, future trends

Powerful Supply Chain: High-Power Connector and Cable for AI server

An AI server's architecture is based on high-density PCB and GPU, especially from NVIDIA or AMD. The power delivery network for the AI server is a significant engineering challenge, and a

Apple, AI server demand power Tripod to record 1Q26 as PCB orders

Taiwanese PCB maker Tripod Technology posted its strongest-ever first-quarter performance in 2026, driven by resilient server and memory demand tied to the global AI

Global AI Server HDI PCB Market Research Report 2025

The global market for AI Server HDI PCB was valued at US\$ 492 million in the year 2024 and is projected to reach a revised size of US\$ 828 million by 2031, growing at a CAGR of 6.9% during the

AI Server PCB Materials and Processes

AI server PCBs serve as the core electronic components within artificial intelligence servers, connecting and supporting critical elements such as processors,

AI Hardware Supply Chains Tested as Iran Tensions Rise

Reuters reported PCB prices jumped as much as 40% in April as manufacturers grappled with shortages of copper foil, epoxy resin, and other materials critical to circuit board production.

Taiwan PCB makers vie for AI server market with new 2026 capacity

As demand for AI infrastructure continues to grow steadily, major networking and server PCB suppliers such as Gold Circuit Electronics (GCE), First Hi-tec (Fht), and Allied Circuit (ACCL)

PCBs: Powering AI Servers 2025

This article will delve into the technological evolution, market dynamics, and future trends of PCBs within the AI server market.
