

PoE switch light is red

Overview

A blinking red A LED indicates that the switch has not been added to a site on the management platform. It is a security feature, because if you haven't set it up yet, anyone else can set it up that is nearby. In a basic PoE power supply system, the major components are the power sourcing equipment (PSE), the powered device (PD), and the PoE cables. Their meanings are as follows: Power indicator light (PWR): Green constantly on: indicates that the power supply of the switch is normal. Does anybody know what the red LED on the PoE+ hat is for?

If it is like the main Pi red LED where always on is "good", is there a dtparam to disable the hat LED?

Thanks! Re: PoE+ Hat Red LED - What does it mean?

The LED lights if it detect an upstream Type 2 power source ie one that can supply. Understanding the lights on your network or Ethernet ports is essential for maintaining a stable and reliable network. This guide explains what each light means, how to. My sxt lte 6 router was working until today when it started snowing.
