

Remote server AI

Overview

This guide covers the practical steps for deploying MCP servers remotely and connecting AI applications to them, including transport options, authentication, and deployment patterns. Connect the Atlassian Platform into your trusted AI tools so you can access information spanning people, services, knowledge, and work right inside your LLMs. Training more people?

Get your team access to the full DataCamp for business platform. For Business For a bespoke solution book a demo. Building AI agents now means connecting them to real systems, not just. I'm happy to announce the general availability of the AWS MCP Server, a managed remote Model Context Protocol (MCP) server that gives AI agents and coding assistants secure, authenticated access to all AWS services through a small, fixed set of tools. The AWS MCP Server is part of the Agent Toolkit. Large language models (LLMs) work with AI agents that handle and fulfill requests by calling prebuilt tools to complete tasks, like sending an email, querying a database, or triggering a workflow. This fully managed MCP server removes management overhead, enabling you to focus on.

A practical guide on how to use the GitHub MCP server

A test repository to experiment with Step 1: Install the remote MCP server Setting up GitHub's remote MCP server server is a breeze compared to

What is an AI server? Why artificial intelligence needs

AI servers are playing an increasingly pivotal role as enterprises across industries race to implement sophisticated gen AI tools and AI agents.

Create Remote MCP Servers from Standard Workflows

Learn how to create remote Model Context Protocol (MCP) servers in a Standard logic app to expose workflows as tools for AI agents, LLMs, and MCP clients in AI enterprise integrations.

Remote jobs

At Amazon, we're looking for passionate innovators across the world to create the next best thing for our customers. Explore our remote roles and apply today.

AI Dedicated Servers | RedSwitches

Deploy AI Dedicated servers with low latency inference, full root access, 99.99% uptime, latest GPUs, crypto payments & 24/7 support. Best AI server hosting for

Local vs remote MCP servers – which should you choose?

Local and remote MCP servers connect AI apps to real-time data and tools. Learn all about them, and which one to use in specific situations.

GitHub RCE Vulnerability: CVE-2026-3854 Breakdown | Wiz Blog

Securing GitHub: Wiz Research uncovers Remote Code Execution in GitHub and GitHub Enterprise Server (CVE-2026-3854) Details on CVE-2026-3854: A critical flaw in GitHub's

Top 15 Remote MCP Servers Every AI Builder Should

Discover the top 15 remote MCP servers transforming AI development in 2026. Learn how they enhance automation, reasoning, security,

Extend Atlassian into any AI assistant using MCP | Atlassian

Atlassian Rovo MCP server securely connects Jira, Confluence and more with your LLM, IDE, or agent platforms of choice. Connect the Atlassian Platform into your trusted AI tools so you can access

Rent AI Servers | Dedicated Servers for AI/ML with

Dedicated server resources for machine learning—rent GPU server for deep learning. Create a custom AI server, machine learning, or deep learning server.

Customer Service Operation Ai Training

Key Responsibilities Contribute expert insights to advance AI-powered customer service solutions. Review and analyze customer service scenarios to provide detailed feedback for AI training.

What is an AI Server? AI Server Architecture Explained

Learn what AI servers are and how they power artificial intelligence. Complete guide to AI server components, architecture, and requirements for ML

Top 7 MCP Servers for AI Agent Development 2026

Explore 7 powerful MCP servers that help AI agents connect with GitHub, Azure, Supabase, Notion, Zapier, and more in 2026.

How to build secure and scalable remote MCP servers

Take this with you Building secure and scalable MCP servers requires attention to authentication, authorization, and deployment architecture. The

Using the fully managed remote BigQuery MCP server

With the release of fully managed, remote Model Context Protocol (MCP) servers for Google services last month, you can now use BigQuery MCP

The AWS MCP Server is now generally available | AWS News Blog

AWS announces the general availability of the AWS MCP Server, a managed remote Model Context Protocol (MCP) server that gives AI agents and coding assistants secure,

MCP and Connectors | OpenAI API

Remote MCP servers can be any server on the public Internet that implements a remote Model Context Protocol (MCP) server. This guide will show how to use

Remote GitHub MCP Server is now in public preview

Remote GitHub MCP Server is now in public preview What is the Remote GitHub MCP Server? The GitHub MCP Server allows AI tools like GitHub

How to Build "Agentic AI" with Google MCP Remote Servers

This step-by-step guide covers Google MCP Remote Servers, real-time troubleshooting, and grounding AI in official documentation.
