

## Remotely restart Huijue core switch

### Overview

To restart an online switch remotely through JaCS: Step 1: Select an online switch to be restarted. Step 2: Click More and then click Reboot. Have you ever calculated the productivity drain when technicians physically reboot 500+ servers across multiple locations?

Remote shutdown commands aren't just technical jargon—they're mission-critical tools in our hyper-connected infrastructure. 05-18-2006 06:20 AM After logging into the switch, you can just issue the "reload" command. 04-20-2022 02:12 AM go to the privilege,ode. Quickest way to fix it with a house hole full of remote workers / schoolers is to reboot the modem, or sometimes it comes back on it's own if it happens overnight. All my devices connected to it work. These remote reboot power switches provide the ability to remotely control the power to servers and other connected devices over an IP network connection or the internet using and HTTP / HTTPS browser by issuing a reboot command. Remote power control switches reduce the need to visit sites when it. Is there a smart way to remotely reboot a POE-switch or camera that has frozen (dont reboot even though its set to reboot every night, for example)?

I understand this can be done if I have a manageable switch that I can log in to and reset, but is there any other smart way of achieving the same.
