

Router cable fiber optic blue light

Overview

Your Quantum Fiber router uses different colored lights to tell you what's going on. Blue means it's connected to the internet. The tables in this article provide detailed information about the possible appearances of the LED lights on each device, the possible causes of each state, and what you should do. And knowing the Modem router lights meaning can save you hours of troubleshooting frustration and help you diagnose problems before they completely. Understanding LED Indicators on a Fiber Router Let's break down what the common LED lights on a fiber router mean and how they behave: 1. POWER Normal: Solid/stagnant light. These lights help users understand the operational state of the device and its various components. Typically, these lights correspond to various router functions such as power. The LEDs on your modem, optical network terminal (ONT), router, or modem/router combo (gateway) are most likely blinking because they're communicating what the device is doing, or there's an error.
