

SK wiring distribution box

Overview

Designed for surface mounting, the SK Series distribution boxes provide a convenient and safe way to distribute and protect electrical circuits in outdoor or wet locations. They are deployed in close proximity to rail tracks. They consist of a bottom. The weatherproof outdoor distribution terminal box for signal cables (SKV 20) is used for signal lines in railway track systems. It connects the cables running from electronic devices (e., track magnets or printed circuit boards) to the control station and interlocking systems. Murrelektronik supplies a comprehensive range of distribution boxes: They create optimum installations for any application and are cost-effective, reliable. SJ-FTTH-SK-18 fiber optic distribution box with 96 fibers 24 ports SC adapters is constructed from lightweight and corrosion-resistant materials, which make it ideal for outside use.
