

Service life of galvanized cable trays in Singapore

Overview

Lifespan (1-2 years to 10 years): Regular galvanized steel trays have a thinner protective coating and are often exposed to corrosion in humid or corrosive environments. In highly corrosive environments, such as coastal or industrial areas, these trays may only last 1 to 2 years. This minimalist design is simple to install and cost-effective, making it ideal for light cable loads and straightforward installations. Single rail trays are often used in smaller projects or where space. Available in various Metallic Material such as Stainless Steel 304 / SS304, 316 / SS316, 316L / SS316L, Hot Dipped Galvanized HDG, GI Galvanized Zinc Plating, Aluminum, Epoxy Painted Coated, Aluminum and Mild Steel Material. Standard Type (Straight Flange) 2. Since our inception in 1992, we have proudly established ourselves as one of Singapore's leading specialists in cable support systems.
