

# Sri Lanka Low Insertion Loss Splitter 4-Core

## Overview

This is a singlemode 1x4 PLC splitter with stable performance. The interface type is SC/UPC which can make the connecting stability. The splitter has low insertion loss and low back. put signal and delivers multiple output signals with specific phase and a power combiner simply by applying each signal singularly into each of the splitter out oss that varies depending upon the phase and amplitude relationship of the signals being combined. Love at first sight, full of happiness; One-click order, full of joy. Wishing you a pleasant shopping experience in my store~. High performance, low insertion loss, and a wide range of uses make this power splitter a reliable choice for various applications. Designed for optimal stability, this 4-way SMA microstrip power splitter ensures consistent signal distribution, making it ideal for reliable wireless applications in. RF power splitters / dividers are passive RF / microwave components used for splitting (or dividing) microwave signals. Mini-Circuits power splitters include 2-way, 3-way, 4-way, 6-way, 8-way and up to 48-way models for 50 Ohm and 75 Ohm systems, with DC-passing and DC-blocking, in coaxial, surface. It is an optical fiber tandem device with many input and output terminals, especially applicable to a passive optical network (EPON, GPON, BPON, FTTX, FTTH etc. ) to connect the MDF and the terminal equipment and to branch the optical signal. Module provides a plug-and-play solution for higher scalability for network upgrades.
