

The Origin of Indian Bridge Structures

Overview

The foundations of ancient Indian bridge engineering focused on creating stable and durable support systems to withstand natural forces and water flow. The British in India had to play much dual roles when they were concerned with Indian administration and welfare of the 'natives'. On one hand the Raj was busy establishing their domination over the. Hally War, a 68-year-old farmer from Siej village, learned the art of creating a jingkieng jri —as the living root bridges are locally known—from his grandfather. Dania Rodrigues In the dawn of times, there were sixteen primordial tribes who lived with their creator in their heavenly abode, the. The Fitzgerald Bridge in Poona, now known as Pune, was built in 1867 and named after Sir William Vesey-FitzGerald who was the Governor of Bombay at the time of construction. It was the Ancient Romans who began experimenting with more sophisticated tools and materials, making them one of the most advanced and sophisticated bridge. Dense, humid broadleaf forests, monsoon-swollen rivers and deep ravines -- in the Indian state of Meghalaya wooden bridges easily decay or are washed away in floodwaters.
